

# Rabbul Alamin Gazi

**M.Sc. Geoinformatics | GIS | Remote Sensing | Spatial Analysis**

Swarupnagar, West Bengal, India | +91 8695424615 | rgazi0030@gmail.com |

linkedin.com/in/rabbul-alamín-gazi

## PROFESSIONAL SUMMARY

M.Sc. Geoinformatics student with a strong foundation in Geography and practical experience in GIS, remote sensing, digital mapping, image processing, spatial analysis, LULC analysis, and multi-criteria suitability assessment. Experienced in applying GIS and remote sensing techniques to environmental monitoring, urban analysis, and geospatial project work.

## EDUCATION

|                                                                               |                                           |
|-------------------------------------------------------------------------------|-------------------------------------------|
| <b>M.Sc. in Geoinformatics</b> — Sangam University, Bhilwara                  | <b>2025-2027   3rd Semester / Ongoing</b> |
| <b>B.Sc. in Geography</b> — West Bengal State University                      | <b>2025   CGPA: 7.03</b>                  |
| <b>Higher Secondary (Class 12)</b> — Bithari K.P. High School (H.S.) [WBCHSE] | <b>2022   83.4%</b>                       |
| <b>Secondary (Class 10)</b> — Bithari K.P. High School (H.S.) [WBBSE]         | <b>2020   53.86%</b>                      |

## ACADEMIC & GIS PROJECTS

### Land Use Land Cover Change Detection using Multi-temporal Remote Sensing and GIS

Case Study: Rajarhat Block, North 24 Parganas, West Bengal

- Multi-temporal satellite data and GIS methodologies for spatial and temporal LULC change analysis.
- Image processing, digitization, classification and spatial interpretation to assess landscape transformation.

### Remote Sensing and GIS for Monitoring and Mitigating Air Pollution in Kolkata

Environmental monitoring and spatial analysis project

- Applied remote sensing and GIS techniques for air-pollution-related spatial analysis and environmental monitoring.

### EV Charging Station Suitability Analysis using GIS - Bengaluru

Multi-Criteria Suitability Analysis for Smart Mobility and Sustainable Transportation

- Used road accessibility, existing EV charging stations, parking availability, population density and LULC as suitability factors.
- Applied raster reclassification and weighted overlay to identify suitable locations for proposed EV charging stations.

## TECHNICAL SKILLS

**GIS Software:** ArcGIS Pro, QGIS, Google Earth Engine, ERDAS Imagine

**Remote Sensing:** Image Classification, LULC Mapping, NDVI, NDBI, NDWI, LST

**GIS Techniques:** Digitization, Georeferencing, Buffer, Reclassification, Raster/Vector, Overlay

**Terrain & Data:** DEM Analysis, Slope, Drainage, OSM Data, Thematic Mapping

## CERTIFICATIONS

- Basics of Remote Sensing, GIS and GNSS** – Indian Institute of Remote Sensing (IIRS), ISRO
- Advances in Remote Sensing Techniques for Geological Applications** – IIRS, ISRO
- Overview of Global Navigation Satellite System and Geographical Information System** – IIRS, ISRO
- Introduction to MS Excel** – Simplilearn (Microsoft SkillUp)
- HTML Training** – Spoken Tutorial, IIT Bombay

## LANGUAGES

Bengali (Native), Hindi, English
